

KEEP A LOW PROFILE.

The SK650 Mechanical Keyboard is a slim keyboard with all the signature Cooler Master features like On-the-Fly Controls and RGB backlighting - but it adds new Cherry MX Low Profile switches. A reduced travel and actuation distance with extra-flat keycaps means you get all the precision and durability of a mechanical keyboard with the slim stylings of a minimalist keyboard. Add in a refined brushed aluminum housing and understated LED ring, and you have a keyboard that looks as good as it performs.

FEATURES

- **Brushed Aluminum Design** - Flat brushed aluminum top plate, floating keycaps, and minimalistic and slim design built with functionality in mind
- **Cherry MX Low Profile Switches** - A reduced travel distance and actuation point with the same signature durability and precision
- **RGB Backlighting** - Keep the lightshow going with per-key backlighting and surrounding lightbars with endless customization
- **On-the-Fly Controls** - Make real-time adjustments to lighting and macros with no software necessary, including Windows Lock On/Off to prevent getting kicked out of the game when the Windows Key is accidentally pressed.
- **Easy-to-use Software** - Map 16.7 million colors to any key, customize lighting modes, or fine-tune macros through Cooler Master's Portal Software Application.
- **Extra Flat Keycaps**; Extra flat, extra square, and extra durable.
- **Removable Type-C USB Cable** for easy transportation and future-proofing.
- **Hybrid Key Rollover** with automatic switching between 6KRO and NKRO to ensure legacy compatibility and that always every press is registered.
